 - Professional growth of employees
- Controlled growth and sustainable development

ENERGO CHOCEŇ, www.energochocen.cz

- Manufacturer and supplier of cooling equipment, pressure vessels, heat exchangers, etc.
- Skids and technological units equipped for compressor, pump, piping, electrical wiring, MaR and similar needs.
- General supplies in the field of cooling -Industrial and food refrigeration, ice rinks, and similar facilities.

Group SEA, www.seacz.cz

- Design, production, supply, and installation of industrial boilers.
- Pressure and vacuum equipment,
- Steam locomotive repairs,
- Control systems

Group Elektromont Brno, www.elektromont.cz

- Comprehensive solutions to all parts of the electrical engineering sector, both in the low and high current ranges
- Installation of measurement and regulation systems, process automation and control.

Tvarmetal, <u>www.tvarmetal.cz</u>

- Tube bending technology up to 150 mm in diameter, bending radius < 1D
- A wide range of welded and assembled parts
- Inhouse design and production of tools and construction of special machinery and equipment,
- Automation
- Thermal pipe insulation

ATC Styl, www.atcstyl.cz

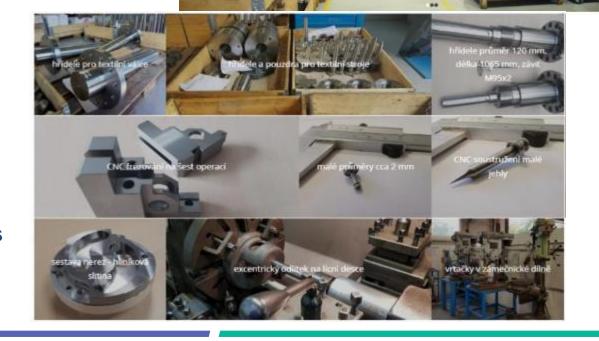

manufacturing of precision machine components according to drawings or specifications in CAD models provided by the customer.

 Welding of carbon and stainless steels using the MIG/MAG method.

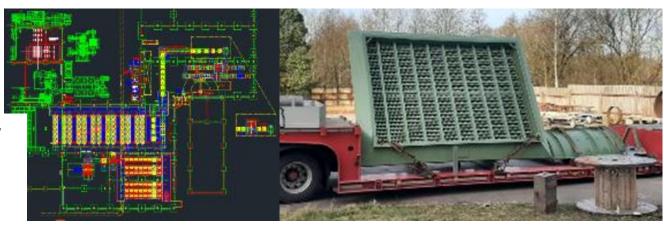

Group Foundry Technologies, <u>www.foundry-technologies.eu</u>

- Custom production for foundry and metallurgical companies.
- Sand preparation systems, mechanical and thermal reclamation, drying tunnels, mobile machines, coreshooters, melting furnaces, aluminum chip processing furnaces, additional burners, complete foundry systems etc.
